SUMMARY

B.Tech Information Technology student at Cochin University of Science and Technology (CUSAT) with experience in web development, data analysis, MATLAB, and digital twin projects. Skilled in Python, JavaScript, database management, technical documentation, and problem-solving. Experienced in collaborative projects and research-oriented work with strong attention to detail and analytical thinking.

EDUCATION

Cochin University of Science and Technology (CUSAT)

Bachelor of Technology (Information Technology), Relevant Coursework, Data Structures and Algorithms, Database Management Systems, Operating Systems, Web Development, Programming Fundamentals *Expected Graduation: 2028*

EXPERIENCE

MATLAB & Simulink Training Program

June 2025

MathWorks Academy

Completed a 30-hour industry-oriented training program covering:

- MATLAB Programming
- Data Analysis & Visualization
- Simulink Modeling
- Statistics & Optimization
- Machine Learning Fundamentals
- Deep Learning Fundamentals
- Signal Processing Concepts

Digital Twin Internship (Ongoing)

- Contributing to digital twin development projects involving governance and industrial systems.
- Participating in data collection, hierarchy mapping, and system modeling activities.
- Supporting research and data preparation for digital twin applications in industrial use cases, including battery recycling.

PROJECTS

Automatic Gate Control System | Technologies: Arduino, Ultrasonic Sensor

- Developed a team-based automation project that opens and closes a gate based on object proximity.
- Implemented distance-based sensing using ultrasonic sensors.
- Gained hands-on experience in embedded systems and sensor integration.

Cinema Ticket Booking System | Technologies: PostgreSQL, Supabase

- Developed a database-driven cinema ticket booking platform as a team project.
- Designed database structures for users, movies, bookings, and seat allocation.
- Applied DBMS concepts to simulate an online ticket reservation workflow.

Career Guidance Platform (HackEuropa – Team CheckMate) | Technologies: Web Development, Firebase

- Participated in HackEuropa as part of Team CheckMate.
- Built a platform to help students explore career paths and receive guidance based on interests and skills.
- Included features such as career recommendations and resume-related support.

Disaster Warning & Guidance Website | Technologies: HTML, CSS, JavaScript

- Developed a website to provide disaster awareness information and safety guidance.
- Focused on accessibility and user-friendly information delivery.

TECHNICAL SKILLS

C

C++

Python

JavaScript

HTML

CSS

React.js

Node.js

MongoDB

PostgreSQL

Supabase

MATLAB

Simulink

Git & GitHub

Data Analysis

Technical Documentation

Research & Information Organization

Problem Solving

Software Development Fundamentals

CERTIFICATIONS

Introduction to Computational Thinking and Basics of Artificial Intelligence using MATLAB and Simulink (30 Hours)

Full Stack Open (Completed Parts 0–4)

MATLAB Onramp Modules

Simulink Learning Modules

ACHIEVEMENTS

Participant, HackEuropa Hackathon (Team CheckMate) Developed a Career Guidance Platform as part of a hackathon project Attended Virtual Reality (VR) Workshop Active learner in Full Stack Development and Data Structures & Algorithms
