SUMMARY

B.Tech Information Technology student at CUSAT with experience in web development, data analysis, MATLAB, and digital twin projects. Skilled in Python, JavaScript, React, database management, technical documentation, and problem-solving.

EDUCATION

Cochin University of Science and Technology (CUSAT) | B.Tech Information Technology | Expected Graduation: 2028

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Web Development, Programming Fundamentals

EXPERIENCE

Digital Twin Internship | Ongoing

- Contributing to digital twin development projects involving governance and industrial systems.
- Working on data collection, hierarchy mapping, system modeling, and research preparation for digital twin applications.

MATLAB & Simulink Training Program | MathWorks Academy | June 2025

- Completed 30 hours of training in MATLAB programming, data analysis, visualization, Simulink modeling, statistics, optimization, machine learning, and deep learning fundamentals.

PROJECTS

Zayna Dresses - Full-Stack Boutique E-Commerce Website | React, Vite, Supabase, Supabase Auth, Supabase Storage, React Router, Vercel

- Built and deployed a boutique e-commerce platform with authentication, product browsing, wishlist, cart, checkout, reviews, order history, and WhatsApp order confirmation.
- Developed a protected admin dashboard to manage products, upload images, monitor stock, filter orders, update delivery status, and track store statistics.
- Implemented stock-aware cart/checkout logic using Supabase database tables and RPC functions to reduce inventory on order placement and restore stock on cancellation.

Live: <https://store-website-beige.vercel.app> | GitHub: https://github.com/shabana044/store_website

Cinema Ticket Booking System | PostgreSQL, Supabase

- Developed a database-driven cinema ticket booking platform and designed structures for users, movies, bookings, and seat allocation.

Career Guidance Platform (HackEuropa - Team CheckMate) | Web Development, Firebase

- Built a platform to help students explore career paths with recommendations and resume-related support.

Automatic Gate Control System | Arduino, Ultrasonic Sensor

- Developed an automation project that opens and closes a gate based on object proximity using ultrasonic sensing.

Disaster Warning & Guidance Website | HTML, CSS, JavaScript

- Developed a user-friendly website for disaster awareness information and safety guidance.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, HTML, CSS | Frontend: React.js, React Router, Vite, Responsive Web Design

Backend & Databases: Node.js, MongoDB, PostgreSQL, Supabase | Tools: Git, GitHub, Vercel, VS Code, Supabase Auth, Supabase Storage

Other: MATLAB, Simulink, Data Analysis, Technical Documentation, Research & Information Organization, Problem Solving

CERTIFICATIONS

- Introduction to Computational Thinking and Basics of Artificial Intelligence using MATLAB and Simulink (30 Hours).
- Full Stack Open (Completed Parts 0-4); MATLAB Onramp Modules; Simulink Learning Modules.

ACHIEVEMENTS

- Participant, HackEuropa Hackathon (Team CheckMate) - developed a Career Guidance Platform.
- Attended Virtual Reality (VR) Workshop; active learner in Full Stack Development and Data Structures & Algorithms.

LANGUAGES

English, Malayalam
